Date prepared: June 9, 2021 Meeting date: July 12, 2021

Subject: Use and Maintenance Agreement with Los Angeles County Flood Control District

---

**RECOMMENDED ACTION:** Authorize the Mayor to sign the Use and Maintenance Agreement between Los Angeles County Flood Control District and the City of Malibu for the Civic Center Storm Drain Diversion Structure Project.

**FISCAL IMPACT:** Funding for this project is included in the Adopted Budget for Fiscal Year 2021-2022, Account No. 310-9070 (Civic Center Stormwater Diversion Structure). Future maintenance costs are estimated to be \$5,000 annually and will be included in future budgets.

**WORK PLAN:** This item was included as item 8.o. in the Adopted Work Plan for Fiscal Year 2021-2022.

**DISCUSSION:** The Civic Center Storm Drain Diversion Structure Project is located near the corner of Civic Center Way and Cross Creek Road and proposes to install a 3-foot concrete weir wall as part of the existing drainage system owned and maintained by the Los Angeles County Flood Control District on Civic Center Way.

The Los Angeles County Storm Drain (County Drain) is a large 11.5 feet x 5 feet box culvert running under Civic Center Way and serves as the area's main drainage outlet, discharging into Malibu Creek. The County Drain is owned and maintained by the Los Angeles County Flood Control District (Flood Control). At approximately 583 feet upstream of the culvert's discharge into Malibu Creek, there is an existing flap gate and concrete curb that diverts storm flows from the County Drain into the Civic Center

Stormwater Treatment Facility (CCSTF). The existing flap gates are intended to prevent water from Malibu Creek from entering the CCSTF. However, the existing flap gates do not seal properly which allows some water from Malibu Creek to get by the flap gates and into the CCSTF.

Staff previously researched replacing the flap gates but the cost to replace them was cost prohibitive. Therefore, staff is proposing to modify the existing County Drain by adding a concrete weir to prevent Malibu Creek water from comingling with the City's CCSTF. The existing flap gates, while insufficient alone, will remain in place as they do provide some protection in conjunction with the new weir.

Since the proposed concrete weir is located with the Flood Control's facilities, Flood Control is requiring the City to enter into a Use and Maintenance Agreement. Under this agreement, the City will be responsible to maintain a portion of the County Drain. Staff recommends the Mayor sign the Use and Maintenance Agreement between Los Angeles County Flood Control District and the City.
